SUMMARY

Results-driven software developer with 6+ years of professional experience, including 5+ years specializing in Ruby on Rails. Proven track record building scalable, high-performance web applications for high-traffic platforms serving millions of users. Skilled in full-stack development, database architecture, third-party API integrations, and performance optimization. Experienced with role-based access control, inventory systems, e-commerce modules, and legacy application modernization (Ruby 1.3 → 3.0, Rails 3.2 → 5.8). Strong collaborator in Agile environments with direct client-facing experience across requirements gathering, deployment planning, and post-launch support.

TECHNICAL SKILLS

- Languages & Frameworks: Ruby on Rails, Python (Django), HTML5, CSS3, JavaScript, jQuery, PHP
- Databases: PostgreSQL (admin, tuning, indexing, backups, replication), MySQL
- Tools & Integrations: AWS (S3, MinIO), Sidekiq, Devise, JWT, CanCanCan, Stripe, SendGrid, HelloSign, ActiveAdmin, Bootstrap 4/5, REST APIs, RSpec, Selenium, Bullet gem
- AI/LLM: OpenAI & Anthropic APIs, RAG, prompt engineering

PROFESSIONAL EXPERIENCE

Ruby on Rails Developer (Contract)

Jan 2026 – Present

Intuit — GoCo (QuickBooks Benefits Administration Platform)

- Working as a contract Ruby on Rails developer on GoCo, a benefits administration platform recently acquired by Intuit and integrated into the QuickBooks ecosystem.
- Building survey functionality from the ground up, including data models, backend logic, and reporting.
- Developing reporting features for HRA (Health Reimbursement Arrangement) workflows.

Ruby on Rails Developer

Aug 2022 – Dec 2025

VcdInfotech — Tuosystems (High-Traffic E-commerce Platform)

- Led development of a scalable inventory management system supporting millions of users across the US and Canada.
- Replaced legacy access control with secure, UI-based role management using CanCanCan.
- Built key features including PDF poster generation, order total-based discounts, and product-level sales tax logic.
- Wrote robust RSpec unit and integration tests, including Selenium-based end-to-end scripts, ensuring feature reliability and cross-browser compatibility.
- Worked as a full-stack developer, supporting frontend development using ERB, HAML, HTML, CSS, JavaScript, jQuery, and AJAX for dynamic, responsive interfaces.
- Participated in client meetings for requirement gathering, deployment planning, and post-launch support.

Ruby on Rails Developer

Sep 2021 – Aug 2022

Witmates Technologies Pvt Ltd — Smartpath (Business Management System)

- Designed and built the entire backend architecture from the ground up; successfully launched Version 1.0.
- Integrated third-party services including SendGrid (email), HelloSign (e-signatures), Amazon S3 (storage), and Sidekiq (background jobs).
- Collaborated with frontend developers to define a consistent, efficient API structure for seamless UI/API integration.
- Implemented secure authentication using Devise and JWT, with role-based access control via CanCanCan.
- Delivered high-performance APIs with comprehensive RSpec test coverage and performance enhancements via the Bullet gem.

Ruby on Rails Developer

Mar 2021 – Sep 2021

Thoughtmines Infotech Pvt Ltd — ACMS (Academic Control Management System)

- Upgraded a large legacy application from Ruby 1.3 to 3.0 and Rails 3.2 to 5.8, enhancing performance and security.
- Resolved critical bugs and improved overall system stability during and after the upgrade.

Python Intern

Dec 2020 – Mar 2021

Asperrow Tech

- Developed and supported Python-based application features as part of a small engineering team.

Python Intern
Entangle IT Solution

Feb 2020 – Aug 2020

- Built and contributed to Python application features, gaining foundational full-stack development experience.

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering

Medi-Caps University, Indore — 2015 – 2019
